Full Stack Developer — Building scalable systems solving real-world problems

EDUCATION

LNCT Group of Colleges (LNCTE)

B.Tech. in Computer Science

Nov 2022 – Jul 2026

Bhopal, Madhya Pradesh

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, JavaScript, Zustand

Backend: Python, FastAPI, Node.js, Express, Flask, Django, REST APIs, JWT

Databases: PostgreSQL, MongoDB, Redis

ML & AI: Scikit-learn, Pandas, LangChain

DevOps & Infra: Docker, GitHub Actions CI/CD, GCP, Nginx, WebSockets, Linux

EXPERIENCE

Full Stack Developer Intern

Oct 2023 – Apr 2024

AICTE IDEALAB, Bhopal, MP

- Engineered a full-stack platform using **Next.js** serving **4000+ students**, streamlining workflows and improving usability at scale.
- Implemented secure admin workflows with **JWT authentication** and **CSRF protection**, preventing unauthorized access and ensuring safe data operations.
- Built dynamic content modules (image gallery) to improve content discoverability and drive higher user interaction

Frontend Developer Intern

Apr 2023 – Oct 2023

KLIC Kalchuri Incubation Center, Bhopal, MP

- Delivered **5+ production-ready web applications** using **React**, improving usability and UI consistency.
- Implemented **fully responsive designs** across devices, enhancing user experience on mobile and desktop.
- Collaborated with the **Apeiro Medica team** to ship user-focused interfaces under **tight deadlines**.

PROJECTS

CoolGuide — Next.js, FastAPI, Node.js, MongoDB, Scikit-Learn Docker, Nginx

Visit Live

- Developed an AI-powered electronics recommendation platform covering multiple categories including laptops, smartphones, TVs, headphones, and home appliances, with **200+ curated products**.
- Engineered a KNN-based recommendation engine using cosine similarity on product metadata and user preference features to generate personalized electronics recommendations.
- Designed a full-stack architecture with Next.js frontend, Node.js backend APIs, FastAPI ML service, and MongoDB for product management and recommendation workflows.
- Fully containerized the application stack using Docker and configured Nginx as a reverse proxy for production deployment with comprehensive setup and architecture documentation.

Backend Framework — Python, Socket Programming, HTTP

Visit Live

- Built a lightweight web framework from scratch using **Python TCP sockets**, implementing HTTP request parsing, routing, and response generation without external frameworks.
- Designed modular **Request and Response abstractions** to manage the HTTP lifecycle and created an extensible routing architecture inspired by modern web frameworks.
- Implemented middleware-style request processing with **logging, authentication flow, and rate limiting** for scalable request handling.

CoolForums — Next.js, Node.js, Express.js, PostgreSQL, Zustand, Socket.IO, Docker, Nginx

Visit Live

- Built a real-time electronics discussion platform with Socket.IO, enabling live chat, posts, comments, and user interactions.
- Implemented JWT authentication, user profiles, and product-specific discussion pages with search and Amazon product integration.
- Designed full-stack architecture using Next.js, Node.js, PostgreSQL, and deployed the application using Docker with Nginx reverse proxy.

ACHIEVEMENTS

- Discovered and responsibly disclosed **4+ web security vulnerabilities** through bug bounty programs, including reports submitted to organizations such as **Visa and Starbucks**, gaining hands-on experience in vulnerability research and responsible disclosure.
- Solved **300+ DSA problems** on LeetCode, strengthening expertise in algorithms, data structures, and competitive programming.
- Built and deployed **10+ full stack and cli scripts** including recommendation systems, real-time platforms, and production-ready applications.
- **Semi-Finalist, Smart India Hackathon 2023 & 2024** – Led teams to develop real-time and NLP-based solutions under 36-hour hackathon sprints, demonstrating leadership, rapid prototyping, and system design skills.
