Full Stack Developer — Building scalable systems solving real-world problems

EDUCATION

LNCT Group of Colleges (LNCTE)

B.Tech. in Computer Science

Nov 2022 – Jul 2026

Bhopal, Madhya Pradesh

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, JavaScript, Zustand

Backend: Python, Go, Java, FastAPI, Node.js, Express, Flask, Django, REST APIs, JWT

Databases: PostgreSQL, MongoDB, Redis

ML & AI: Scikit-learn, Pandas, LangChain

DevOps & Infra: Docker, Kubernetes (AKS - learning), GitHub Actions CI/CD, Azure, Nginx, WebSockets, Linux

EXPERIENCE

Full Stack Developer Intern

Oct 2023 – Apr 2024

AICTE IDEALAB, Bhopal, MP

- Engineered a full-stack platform using **Next.js** serving **4000+ students**, streamlining workflows and improving usability at scale.
- Implemented secure admin workflows with **JWT authentication** and **CSRF protection**, preventing unauthorized access and ensuring safe data operations.
- Built dynamic content modules (image gallery) to improve content discoverability and drive higher user interaction

Frontend Developer Intern

Apr 2023 – Oct 2023

KLIC Kalchuri Incubation Center, Bhopal, MP

- Delivered **5+ production-ready web applications** using **React**, improving usability and UI consistency.
- Implemented **fully responsive designs** across devices, enhancing user experience on mobile and desktop.
- Collaborated with the **Apeiro Medica team** to ship user-focused interfaces under **tight deadlines**.

PROJECTS

CoolGuide — FastAPI, Next.js, MongoDB

Visit Live

- Engineered full-stack recommendation platform serving **800+ unique visitors** with **sub-200ms API latency** at 95th percentile.
- Built personalized recommendation system using **KNN + collaborative filtering** — increased product discovery conversion by **25%**.
- Designed responsive Next.js frontend with Zustand; implemented FastAPI backend with async handling for **50+ concurrent users**.

Backend Framework — Python, Socket Programming, HTTP

Visit Live

- Built a lightweight web framework from scratch using **Python TCP sockets**, implementing HTTP request parsing, routing, and response generation without external frameworks.
- Designed modular **Request and Response abstractions** to manage the HTTP lifecycle and created an extensible routing architecture inspired by modern web frameworks.
- Implemented middleware-style request processing with **logging, authentication flow, and rate limiting** for scalable request handling.

Coolforums — WebSockets, Docker, Redis

Visit Live

- Architected real-time platform with WebSocket connections supporting **500+ concurrent users** and **50ms broadcast latency**.
- Deployed Docker Compose microservices with GitHub Actions CI/CD — cut deployment time **15min → 2min** (87% faster).
- Implemented Redis pub/sub for cross-service message sync.

CoolCounsel — React, Express, MongoDB

Visit Live

- Analyzed **10,000+ DTE records** to build recommendation engine; helped **1,000+ students** reduce decision time from weeks to minutes.
- Designed REST APIs with MongoDB aggregation — achieved **200ms response time** under **50 concurrent users**.
- Built responsive React frontend with advanced filtering and comparison tools.

ACHIEVEMENTS

- Solved **300+ DSA questions**, building strong problem-solving skills for scalable full-stack systems on Leetcode.
- Built and deployed **20+ full-stack and ML projects** with real-world usage and production setups.
- Semi-Finalist, Smart India Hackathon 2023 & 2024** — Led teams to build **real-time and NLP-driven applications** under **intense competitive timelines**, demonstrating rapid system design and execution.
